WORKCRAFT Local

MASTER TECHNICAL ARCHITECTURE & COMMERCIAL BLUEPRINT

Target Regions: South Asia & MENA | Engine: Go (Golang) + Meta Cloud API | Document Version: 2.4

1. EXECUTIVE SUMMARY & MARKET POSITIONING

WORKCRAFT Local is a specialized B2B automation platform engineered for small service-based businesses (Gents Salons, Ladies Parlors, Dental Clinics, and Fitness Centers). By discarding expensive third-party SaaS wrappers (e.g., ManyChat) in favor of a proprietary **Go (Golang)** engine integrated directly with the **Meta Cloud API**, WORKCRAFT Local achieves an ultra-low operating cost (~$5/month total server cost) while delivering high-margin, fully managed automation to regional business owners.

95%+	$0.00	< 1%	3-in-1
GROSS PROFIT MARGIN	3RD-PARTY SAAS RENT	WHATSAPP BAN RISK	REVENUE STREAM MODEL

2. CORE COMPETITIVE ADVANTAGE (VS. REGIONAL SAAS)

Feature / Metric	Standard Competitors (WATI / AiSensy)	WORKCRAFT Local Architecture
Business Model	Self-serve software dashboard (Complex for owners)	**100% Done-For-You Managed Service** (Zero tech work)
Monthly Software Rent	$25 – $99 / month PER client account	**$0 / month** (Proprietary Go engine over Meta API)
Day-1 Contact Import	Manual individual contact entry or complex CSV setup	**Instant Day-1 CSV/List Ingestion** (200+ client numbers loaded instantly)
Language Engine	Single language or manual translation toggles	**Native Tri-lingual State Router** (EN / AR / UR)
Voice Communication	Ignored or converted to text via paid APIs	**Native Voice Handoff** (Audio-to-audio human reply)

Strategic Principle: The "Zero-Dashboard" Advantage

Local salon and parlor owners in South Asia and MENA refuse to manage complex English software portals. WORKCRAFT Local routes all automated client bookings silently in the background while allowing salon owners to operate entirely through their standard mobile phone app.

3. BACKEND INFRASTRUCTURE & SYSTEM FLOW

The backend engine is compiled into a single static **Go binary** deployed on a high-speed Linux cloud VPS ($5/month). Go's lightweight goroutines allow a single server instance to handle over 10,000 concurrent WhatsApp webhooks without memory degradation.

4. ADVANCED OPERATIONAL FEATURES

Day-1 Instant Contact Onboarding Tool (200+ Clients Ingestion)

When a salon owner signs up, they can immediately provide their existing contact list (200+ phone numbers from Excel, VCF, or phone contacts). WORKCRAFT Local instantly parses, cleanses, and uploads these numbers into their dedicated Supabase database on Day 1, enabling immediate video broadcast reach.

1-Screen Mobile Interface UI (Anti-Cropping Logic)

To eliminate vertical scrolling fatigue on 5.5" to 6.7" smartphone screens, the Go engine compresses multi-step booking options into a single interactive **WhatsApp Menu Card** (Category + Stylist + Slot in one view). This guarantees 100% visibility without text cropping and reduces Meta API message count by 60%.

Missed Call Auto-Text Trigger ($0 Cost Integration)

When a customer calls the salon phone and the receptionist is busy or the shop is closed, an Android background listener (Tasker / SIM Gateway) triggers an instant WhatsApp response: *"Sorry we missed your call! Tap here to select your appointment slot on WhatsApp."* Operates at **$0 operational cost** over local SIM plans.

5. COMMERCIAL STRUCTURE & PRICING TIERS

Package Level	One-Time Setup Fee	Monthly Maintenance	Included Systems
Package 1: Essential	PKR 15,000 / AED 500	PKR 1,500 / AED 50	Tri-lingual Booking Bot, Slot Checker, Map Pin Delivery, Day-1 200+ Contact Import.
Package 2: Growth	PKR 20,000 / AED 650	PKR 2,000 / AED 75	Package 1 + Missed Call Auto-Text + Pay-Per-Deal 60s Video Engine.
Package 3: Enterprise	PKR 25,000 / AED 850	PKR 2,500 / AED 100	Package 2 + 2-Step Google Review Booster (Smart feedback filtering).

6. SMART 2-STEP GOOGLE REVIEW BOOSTER

Post-Appointment Feedback Routing

2 hours after a completed service, the bot sends an automated rating prompt: *"How was your experience today? Rate 1 to 5 Stars."*

- **5-Star Ratings:** Instantly redirected to the salon's official Google Business Profile map link to leave a public 5-star review.
- **1 to 4 Star Ratings:** Intercepted internally and sent straight to the owner's private WhatsApp chat. Protects public Google ratings while giving the owner actionable private feedback.

7. AUTOMATED MAINTENANCE & DISCONNECTION POLICY

Automated Billing & Disconnection Notice Flow

- **Advance Reminder (T-2 Days):** Invoice notification sent on the 28th of the month.
- **Due Date (30th of Month):** Fee due via EasyPaisa, JazzCash, or bank transfer.
- **Grace Period (3 Days):** System and support remain fully active.
- **Red Alert Notice (T+4 Days):** Salon owner receives a firm direct message: *"Red Alert: If maintenance charges are not paid today, maintenance support will be disconnected. Any future technical issue or system adjustment will incur higher charges."*
- **Back-End Policy:** Flexible 1-week grace window to collect regular fees without harsh lockout friction.

8. PAY-PER-DEAL VIDEO BROADCAST ENGINE (60S LIMIT)

High-Impact Weekend Broadcasts (Up to 60 Seconds)

Salon owners record up to a **60-second video** showcasing weekend discounts. Upon paying PKR 1,500 (or AED 50) via local payment gateway, the system queues the video through Meta Cloud API to all stored client numbers (including the Day-1 imported contacts) with interactive *[Book Now]* and *[Stop / Unsubscribe]* buttons.
